

DUAL MAVERICK™ 450

ENGINE-DRIVEN WELDER/GENERATOR

K4381-1 Dual Maverick 450

The Power of Two

Built for the construction site, the pipeline, and the rental fleet, the Dual Maverick 450 is two complete welders in one.

The design features the 26.4 HP @ 3000 RPM Perkins® 403D-11 Tier 4i water cooled diesel engine. That is enough power for two operators to weld at the same time, or for one operator to gouge with up to a 3/8 in. [9.5 mm] carbon.
